Informação complementar relativa à averiguação das causas de incumprimento dos VP (causas e medidas corretivas):

No incumprimento ao parâmetro Radão, a EG mantém um controlo operacional de frequência Trimestral no reservatório para avaliação dos resultados ao longo do ano.
Verificou-se que a concentração de Radão tem apresentado uma elevada variabilidade anual e a análise da avaliação de risco (AVR) classificou o nível como moderado.

Informação complementar relativa à averiguação das causas de incumprimento dos VP (causas e medidas corretivas):

O incumprimento ao parâmetro pH deve-se às características hidrogeológicas da origem de água. Não foram tomadas medidas corretivas, uma vez que não existe um risco direto para a saúde pública.
